

DEPILATORY

Yuswati FT UNY- yuswati@uny.ac.id

- Nothing beats waxing for smooth, hair-free skin all summer long. Because waxing removes hair at the root the results are more effective and last longer than shaving.
- If you're tired of shaving every day, waxing may be for you -- but it can be intimidating for beginners. No worries, we're here to guide you every step of the way!

- Waxing eyebrows is very popular in designing brows because it's fairly quick and can last weeks, but salon and spa prices can really add up.
- So if you're looking to save some money, we'll walk you through the steps of waxing your brows right at home.

- I recommend using a cream wax heated up in a wax pot.
- Cream waxes are the most gentle types of wax, so it works well in the delicate, sensitive eye area.
- Heated wax is going to grab onto the hair much more than pre-made cold wax strips, and give much smoother results.
