Editor and Reviewer comments:

Please provide a point by point response to the reviewers comments:

Reviewer 1:

Methods:

The methodology section is unclear and will need revisions. It should provide justifications on why the study case specifically refers to the 2019 general election, and how the empirical data is attained.

Results:

A major point of revision for this is that the author needs to link the findings to the general discourse of general election disputes. This article only provides a general argumentation on the roles of the justice courts in general election administrative disputes, and seems to be disconnected to academic theories and past findings.

Interpretation:

Interpretation is well written, still lacks the vivid connection with past studies.

Other comments:

Theoretical and conceptual framework is not evident.

Reviewer 5:

Methods: The research method used is not clear, whether this research uses empirical data or others, where the source of the data is, and how the data can be used as a reference in the General Election Administration Dispute Resolution in Indonesia.

Results: 1. The data displayed needs to be sorted out whether it is part of an election dispute in the presidential election, legislative election, or regional election;
2. The position and role of non-court dispute resolution institutions or referred to as alternative dispute resolutions in election disputes needs to be well described;
3. There are various state institutions in Indonesia in the process of resolving general election disputes, maybe this needs to be explained as well.

Interpretation: Need to be reformulated

Other comments: Need perfect improvement to meet scientific journal standards

Overall, this was a great manuscript to review. The level of detail was perfect, and analysis was strong.

Data in Brief (optional):

We invite you to convert your supplementary data (or a part of it) into an additional journal publication in Data in Brief, a multi-disciplinary open access journal. Data in Brief articles are a fantastic way to describe supplementary data and associated metadata, or full raw datasets deposited in an external repository, which are otherwise unnoticed. You can submit to Data in Brief when you upload your revised manuscript. To do so, complete the template and follow the co-submission instructions found here: www.elsevier.com/dib-template. If your manuscript is accepted, your Data in Brief submission will automatically be transferred to Data in Brief for editorial review and publication.
