Mengapa Multimedia?

What is the promise of multimedia learning?

- can be designed in ways that are consistent with how people learn, and thus can serve as aids to human learning (Mayer, 1997, 1999a, 1999b, 2001).
- students learn more deeply from well designed multimedia presentations than from traditional verbal-only messages, including improved performance on tests of problem-solving

What is the promise of multimedia learning?

- (a) the presentation contains words and pictures, and
- (b) the presentation is designed to foster meaningful learning.
