=========
IMPORTANT!!
=========
For ORIGINAL/RESEARCH PAPER: the paper should be presented with IMRaD model:
1. Introduction
2. Research Method

3. Results and Discussion
4. Conclusion.
We will usually expect a minimum of 30 references primarily to journal papers. Citations of textbooks should be used very rarely and citations to web pages should be avoided. All cited papers must be referenced within the body text of the manuscript.

For REVIEW PAPER: the paper should present a critical and constructive analysis of existing published literature in a field, through summary, classification, analysis and comparison. The function and goal of the review paper is:
1) to organize literature;
2) to evaluate literature;
3) to identify patterns and trends in the literature;
4) to synthesize literature; or
5) to identify research gaps and recommend new research areas.
The structure of a review paper includes:
1. Title – in this case does not indicate that it is a review article.
2. Abstract – includes a description of subjects covered.
3. Introduction includes a description of context (paragraph 1-3), motivation for review (paragraph 4, sentence 1) and defines the focus (paragraph 4, sentences 2-3)
4. Body – structured by headings and subheadings
5. Conclusion – states the implications of the findings and an identifies possible new research fields
Number of minimum references for review paper is 50 references (included minimum 40 recently journal articles).

In preparing your revised paper, you should pay attention to:
1. Please ensure that: all references have been cited in your text; Each

citation should be written in the order of appearance in the text; The citations must be presented in numbering and CITATION ORDER is SEQUENTIAL [1], [2], [3], [4], ...
Please download & study our published papers for your references:
- http://ijere.iaescore.com
- http://journal.uad.ac.id/index.php/edulearn
- http://ijece.iaescore.com
- http://ijeecs.iaescore.com
(Please use "Search" menu under "JOURNAL CONTENT" menu in right side of the site)

2 An Introduction should contain the following three (3) parts:
- Background: Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the art of the field the report is about.
- The Problem: If there was no problem, there would be no reason for writing a manuscript, and definitely no reason for reading it. So, please tell readers why they should proceed reading. Experience shows that for this part a few lines are often sufficient.
- The Proposed Solution: Now and only now! - authors may outline the contribution of the manuscript. Here authors have to make sure readers point out what are the novel aspects of authors work. Authors should place the paper in proper context by citing relevant papers. At least, 5 references (recently journal articles) are cited in this section.

3. Results and discussion section: The presentation of results should be simple and straightforward in style. This section report the most important findings, including results of statistical analyses as appropriate. You should present the comparison between performance of your approach and other researches. Results given in figures should not be repeated in tables. It is very important to prove that your manuscript has a significant value and not trivial.

Update your metadata in our online system when you submit your revised paper
through our online system, included:
- Authors name are presented without salutation
- Authors Name are presented Title Case (ex: Michael Lankan, and NOT
written--> michael lankan or MICHAEL LANKAN). Add all authors of your paper
as per your revised paper
- Title of revised paper (ex: Application of space vector .... , NOT -->
APPLICATION OF SPACE VECTOR ....)
- Content of updated abstract

URGENT!! Pay attention to the following instructions carefully! YOU MUST

DO!!

1). PLEASE ADHERE STRICTLY THE GUIDE OF AUTHORS
http://iaescore.com/gfa/ijere.docx (Use this file as your paper template!!)
and pay attention to the checklist for preparing your FINAL paper for
publication:
http://ijere.iaescore.com/index.php/IJERE/about/editorialPolicies#custom-2

2). It is mandatory to present your final paper according to "IMRADC style"
format, i.e.:
    1. INTRODUCTION
    2. The Proposed Method/Framework/Procedure specifically designed
(optional)
    3. METHOD
    4. RESULTS AND DISCUSSION
    5. CONCLUSION
    See http://iaescore.com/gfa/ijere.docx

3). Add biographies of authors as our template (include links to the 4
authors' profiles, do not delete any icons in the template).
--> Provide links for all authors to the 4 icons (Scholar, Scopus, Publons
and ORCID). It is mandatory!! See http://iaescore.com/gfa/ijere.docx

4). Use different PATTERNS for presenting different results in your
figures/graphics (instead of different colors). It is mandatory!! See
http://iaescore.com/gfa/ijere.docx

5). Please ensure that all references have been cited in your text. Use a
tool such as EndNote, Mendeley, or Zotero for reference management and
formatting, and choose IEEE style. Each citation should be written in the
order of appearance in the text in square brackets. For example, the first
citation [1], the second citation [2], and the third and fourth citations

[3], [4]. When citing multiple sources at once, the preferred method is to list each number separately, in its own brackets, using a comma or dash between numbers, as such: [1], [3], [5]. It is not necessary to mention an author's name, pages used, or date of publication in the in-text citation. Instead, refer to the source with a number in a square bracket, e.g. [9], that will then correspond to the full citation in your reference list.
Examples of in-text citations:

This theory was first put forward in 1970 [9].
Zadeh [10] has argued that ...
Several recent studies [7], [9], [11]-[15] have suggested that....
... end of the line for my research [16].

6). Please present all references as complete as possible and use IEEE style (include information of DOIs, volume, number, pages, etc). If it is available, DOI information is mandatory!! See
http://iaescore.com/gfa/ijere.docx
