

LESSON PLANNING

Discussion

Examining a lesson plan

- ▣ Examine the suitability of SK, KD learning objectives and indicators.
- ▣ Look at the method used.
- ▣ Examine the learning procedures:
 - Are there any pre-whilst- and post-teaching activities?
 - Are activities in each stage clear and doable?
 - Are the time allocated in each stage proportional?
 - Does each activity build up the competence to be achieved?
- ▣ Is there any evaluation? What are the technique, form, instrument and scoring system used?
- ▣ What are the strength and weaknesses of your friend's lesson plan?
