I. DESKRIPSI MATA KULIAH

Semantics provides an introductory study on meaning in language with a focus on English, covering such topics as propositions, referring expressions, universes of discourse, synonyms, antonyms, hyponyms, homonymy, polysemy, derivation, participant roles, and speech acts. During the course, learning mostly through inquiry and discovery, students are introduced to defined concepts with clarifying examples followed by exercises in applying the principles involved. On the whole, they are presented with cases pertinent to the topics and analyze the cases in prescribed ways.

II. STANDAR KOMPETENSI MATA KULIAH

At the end of the course students will achieve a competency in conducting studies on meaning in language, indicated by an awareness of the various aspects of meaning in language and an experience and ability in analyzing meaning in verbal communication.
