Pengantar

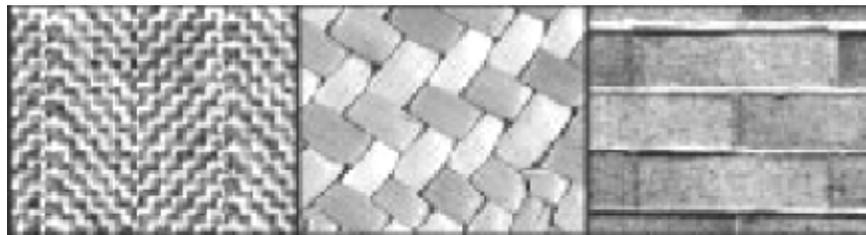

Tekstur adalah tampilan permukaan (corak) dari suatu benda yang dapat dinilai dengan cara dilihat atau diraba. Pada prakteknya, tekstur sering dikategorikan sebagai corak dari suatu permukaan benda, misalnya permukaan karpet, baju, kulit kayu, dan lain sebagainya.

Tekstur merupakan karakteristik intrinsik dari suatu citra yang terkait dengan tingkat kekasaran (*roughness*), granularitas (*granulation*), dan keteraturan (*regularity*) susunan struktural piksel. Aspek tekstural dari sebuah citra dapat dimanfaatkan sebagai dasar dari segmentasi, klasifikasi, maupun interpretasi citra.

Tekstur dapat didefinisikan sebagai fungsi dari variasi spasial intensitas piksel (nilai keabuan) dalam citra. Berdasarkan strukturnya, tekstur dapat diklasifikasikan dalam dua golongan :

- **Makrostruktur**

Tekstur makrostruktur memiliki perulangan pola lokal secara periodik pada suatu daerah citra, biasanya terdapat pada pola-pola buatan manusia dan cenderung mudah untuk direpresentasikan secara matematis.

Gambar 1. Contoh tekstur makrostruktur

- **Mikrostruktur**

Pada tekstur mikrostruktur, pola-pola lokal dan perulangan tidak terjadi begitu jelas, sehingga tidak mudah untuk memberikan definisi tekstur yang komprehensif.

Gambar 2. Contoh tekstur mikrostruktur

```
glutDisplayFunc(display);
glutReshapeFunc(reshape);
glutKeyboardFunc(keyboard);
glutMainLoop();
return 0;
}
```

Tugas

1. Cobalah program diatas
2. Lakukan perubahan sintak atau nilai yang ada dalam program diatas (yang berhubungan dengan texture saja)
3. Masukkan hasil pengamatan dan masukan hasilnya yang disertai gambar hasil compile dalam tabel pengamatan yang disesuaikan dengan pengamatan anda.
4. Pada labsheet praktikum topik ini belum di lengkapi dengan teori mengenai teksture secara detail oleh karena itu buatlah makalah yang berisi tentang texture dengan topik:
 - a. Tekture obyek serta Tekture koordinat → **NIM ganjil**
 - b. Teksture matrik serta Pencahayaan dan teksture → **NIM genap**Makalah minimal 2 halaman A4 1 spasi, font: new time roman 12, tidak termasuk contoh program – kumpulkan soft copy.

Hasil dikumpulkan minggu depan
